

[User Story 642929](#): COMPLETE: Implementation of Location validation over Save button.

- If the asset is a consumable or linear, no asset tag generation logic should be used, it should get created using the existing OOB behavior
1. In Before Insert Business Rule, we've configured condition, Class is not Linear Asset & added all the Location Validations.

The screenshot shows the configuration page for a business rule named "EAM - Asset Tag Generate & Location Valid". The page is divided into several sections:

- Header:** Includes the rule name, table "Enterprise asset [sn_ent_asset]", application "Global", and checkboxes for "Active" and "Advanced", all of which are checked.
- When to run:** A tabbed interface with "When to run", "Actions", and "Advanced" tabs. The "When to run" tab is active.
- When to run section:** Contains a "When" dropdown set to "before", an "Order" input field with the value "90", and checkboxes for "Insert" (checked), "Update", and "Delete".
- Filter Conditions:** A section with buttons "Add Filter Condition" and "Add 'OR' Clause". Below these, a condition is defined: "Class" is not "Linear asset".
- Logic Operators:** Buttons for "AND", "OR", and a red "X" button.

- When creation of asset and if no location is entered, then system should display an error message on the header screen: "Please enter location."
- If the entered location is above the site level, then display error message "Enter a location that is tagged to a country"
- If country (Site) of the location is blank, then display error message "Location is not tagged to a country"
- If the country is not present in the asset tag generation table "Automatic Asset tag generation is not set up for a country"

Business Rule
EAM - Asset Tag Generate & Location Valid

```
13 //US - 642929
14 //If location field is blank
15 if (!current.location) {
16     gs.addErrorMessage("Please enter location");
17     current.setAbortAction(true);
18 }
19 //If location is above Site(Country) level
20 else if (current.location.cmnn_location_type == 'region') {
21     gs.addErrorMessage('Enter a location that is tagged to a country');
22     current.setAbortAction(true);
23 }
24 //If country of the location is blank
25 else if (!current.location.u_site) {
26     gs.addErrorMessage('Location is not tagged to a country');
27     current.setAbortAction(true);
28 } else {
29
30     //US - 642930 - Asset Tag Generation
31     var gr = new GlideRecordSecure('u_asset_tag_generation');
32     gr.addEncodedQuery('u_country=' + current.location.u_site.getDisplayValue());
33     gr.query();
34     if (gr.next()) {
35         if (gr.u_count >= 999999999) {
36             gs.addErrorMessage("Automatic asset tag generation is not set up for the asset's
37             location country.");
38             current.setAbortAction(true);
39             return;
40         }
41     }
42 }
```

Code with Now Assist

2. In After Insert Business Rule, updated the condition, Class is not Linear asset
