

Instance Data Replication

IDR plug-in Installation

Since we don't have access to Install or Repair IDR plug-in, we've to raise a HI case which includes information like Target Instance, ID & Name of the plugin with ServiceNow.

- IDR installed in Producer Instance – Support (Sbox3)

The screenshot shows the 'Sys Plugins Instance Data Replication' page in the Sbox3 instance. The top section displays the plugin details: Name (Instance Data Replication), Source (com.glide.idr), Install date (2024-10-09 07:43:59), and Parent (empty). Below this is a table of application files for the 'Instance Data Replication' package. The table has columns: Display name, Application, Class, Created by, Customer update (No Longer Used), Protection policy, and Replace on update. The rows are: Document Key (Global, Dictionary Entry, guest, false, false), .idr_admin (Global, Access Roles, admin, false, false), Replication Shared Key Instructions (Global, Message, admin, false, false), and idr_consumer_set (Global, List Control, admin, false, false).

Display name	Application	Class	Created by	Customer update (No Longer Used)	Protection policy	Replace on update
Document Key	Global	Dictionary Entry	guest	false		false
.idr_admin	Global	Access Roles	admin	false		false
Replication Shared Key Instructions	Global	Message	admin	false		false
idr_consumer_set	Global	List Control	admin	false		false

- IDR installed in Consumer Instance – Places (Placesbox1)

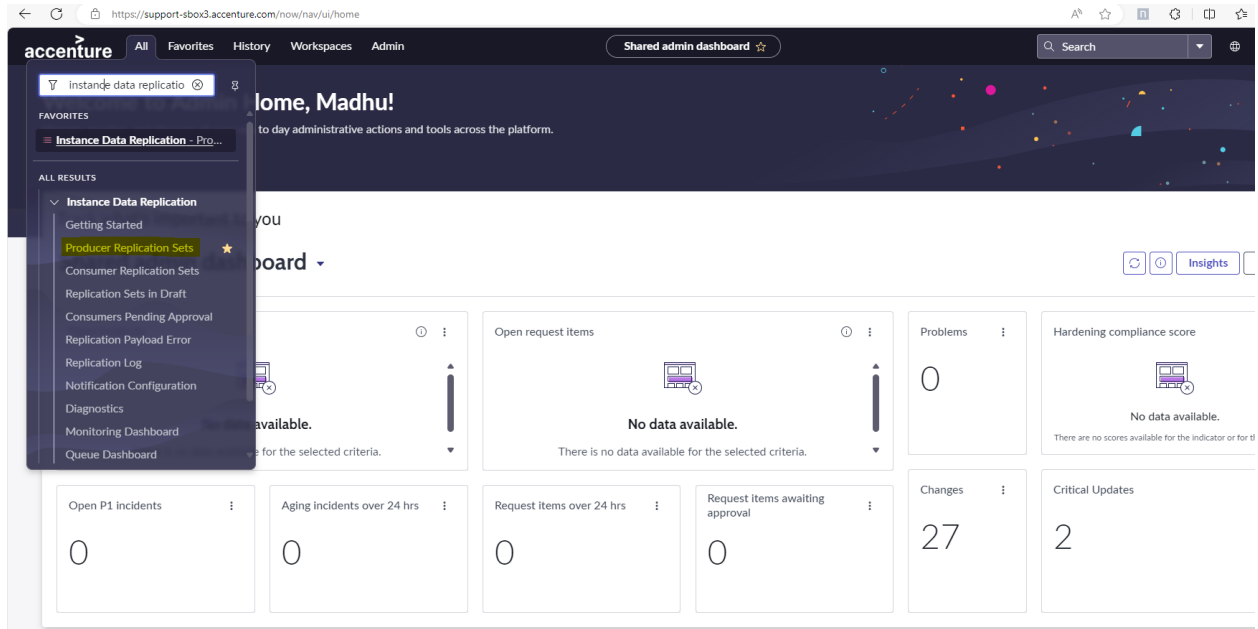

The screenshot shows the 'Sys Plugins Instance Data Replication' page in the Placesbox1 instance. The top section displays the plugin details: Name (Instance Data Replication), ID (com.glide.idr), Install date (10/03/24 02:54:16 AM), and Parent (empty). Below this is a table of application files for the 'Instance Data Replication' package. The table has columns: Display name, Class, Update name, Application, Protection policy, Created by, and Update. The rows are: .idr_admin (Access Roles, sys_security_acl_role_003912fe4332211005..., Global, admin, admin), Replication Shared Key Instructions (Message, sys_ui_message_003de05b5300330049d5ddeef..., Global, admin, admin), idr_consumer_set (List Control, sys_ui_list_control_0046a0d373320300ab66..., Global, admin, admin), and Messages Processed (Dictionary Entry, sys_dictionary_idr_queue_stats_messages_..., Global, guest, guest).

Display name	Class	Update name	Application	Protection policy	Created by	Update
.idr_admin	Access Roles	sys_security_acl_role_003912fe4332211005...	Global		admin	admin
Replication Shared Key Instructions	Message	sys_ui_message_003de05b5300330049d5ddeef...	Global		admin	admin
idr_consumer_set	List Control	sys_ui_list_control_0046a0d373320300ab66...	Global		admin	admin
Messages Processed	Dictionary Entry	sys_dictionary_idr_queue_stats_messages_...	Global		guest	guest

Configuring IDR Replication Sets

In Producer Instance (Sbox3)

Step1: Goto -> Instance Data Replication -> Producer Replication Sets

-> Click on New

The screenshot shows the 'Producer Replication Sets' table in the Accenture support-sbox3 admin dashboard. The table has three columns: 'Name', 'Description', and 'Active'. The 'procPO-test' row is highlighted, and the 'New' button is visible in the top right corner.

Name	Description	Active
Asset-creation-test		false
asset-test		true
Assets-test1		false
IdrTest		true
Incident-test		true
procPO-test		true
procPOItem		false
test2	Just for test	false

Step 2: Enter the Name & Submit the form & In Outbound Entries, Click on New

https://support-sbox3.accenture.com/idr_producer_set.do?sys_id=6cdc6948333a96908bd692ac4f5c7bb1&sysparm_view=&sysparm_domain=null&sysparm_domain_scope=record&sysparm_record_row=2&sysparm...
